CSC 202-901/910: Discrete Structures for Computer Science, Spring 2010

Academic Integrity Pledge for Course Assessments

I, _(your name here)_____, pledge that I have read the Academic Integrity policy of DePaul University. (The policy can be found here: http://academicintegrity.depaul.edu/AcademicIntegrityPolicy.pdf and other resources on Academic Integrity can be found here: http://academicintegrity.depaul.edu/)

I understand that assignments must reflect individual work. While I may consult the course notes, course recordings, the course textbook, other textbooks, and online resources as well as discuss the assignments with tutors and other students, I may not under and circumstances submit work that is not my own. Further, I understand that I may not work so closely with someone, including tutors and other students, so as to produce identical (or near identical) answers.

I understand that the midterm and final exams are closed book. For the midterm, I may use up to 2 pages of notes single-sided or 1 page of notes double-sided. For the final exam, I may use up to 6 pages of notes single-sided or 3 pages of notes double-sided. The sheet(s) of notes must be handed in with my exams. I may not use any other written materials. I may also use a (non-programmable) calculator during the exams. I am not allowed to access other electronic devices such as cell phones or laptop computers during the exams. I may not communicate with anyone other than Dr. Settle (or my proctor as applicable) during the exams. I am not allowed to discuss the final exam with any person other than Dr. Settle after I have taken it.

I understand that failing to adhere to any of the above stated policies on the assessments for the course is a violation of the Academic Integrity Policy at DePaul University. I understand that if this occurs Dr. Settle will file a violation of the Academic Integrity policy for me and that I will receive a 0 on the associated assessment(s).
